Eclipse™ Downdraft
Ducted — 3-1/4" x 10"
500 CFM

Broan® 27000 Series Downdraft System ECLIPSE®

Ultimate styling complements virtually every cooktop style. Mounts behind most built-in cooktops in island, peninsula and wall mount installations. The unit mounts flush with the cooktop when not in operation, and is activated by light pressure on the cover which automatically raises a motor driven air intake chimney 7" above the cooktop. The elevated chimney enables smoke and vapor to be captured at the top of most cooking vessels. A touch on the top of the chimney retracts it to its down position. Washable aluminum filters. Fits 3-1/4" x 10" duct.

It's a pretty simple concept. Mount a high efficiency ventilator in an out-of-the-way location and get the exhaust needed with virtually no sound. Suitable for intermittent or continuous duty. Install the fan in the attic, basement, crawlspace or wherever is convenient. Energy efficient, permanently lubricated motors with high-pressure centrifugal blower wheels accommodate longer duct runs. Designed for quick, easy installation. Removable panels offer easy access to the motor without disturbing ductwork.

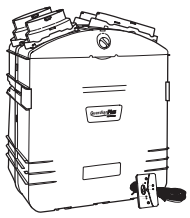
Indoor Air Quality Products



Broan® Fresh Air Systems

The Fresh Air Systems represent a revolutionary line of whole house HEPA filtration products featuring patent pending technologies and manufacturing processes. HEPA (High Efficiency Particulate Air) filters are among the most effective available. They capture 99.97% of all particles as small as 0.3 microns. They help reduce allergy symptoms, asthma, recurring colds and cough. Proper ventilation is vital for healthy indoor air. Ventilation models exhausts harmful pollutants that are not eliminated by filtration, such as carbon monoxide and other harmful gasses to the outside.
